ATTEN

ST-1020D

Intelligent Static Eliminator DC Ion Fan

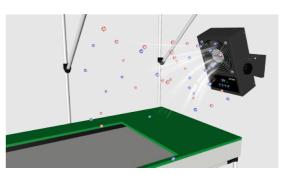

Eliminating static electricity from 1000V to 100V within 1.2s

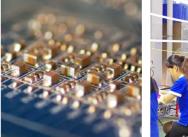

Specification

Tem

Applications

scientific research industry

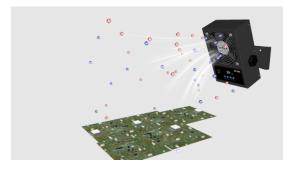

PCB board

Factory assembly line Automation equipment Printing industry

ST-1020D
AC 220-240V~ 50/60Hz
20W
≤2.4m ³ /min
≤1.2S
±10V
±15V ~ ±50V
Yes
400*1500mm
LED
Pluggable
Support
nperature: 0°C~45°C Humidity:<75%RH
146 (L) x85 (W) x238 (H) mm
≈3.16Kg

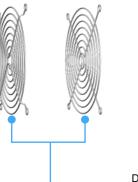

precision equipment industry

Features

Double-roller DC fan, long life and low noise

Double-layer isolation front cover design, isolate external interference

> Pluggable ion emitting needle Replace emitting needle without changing the launcher, saving maintenance costs

Angle adjustable knob Angle adjustable knob 0~265°air outlet adjustable

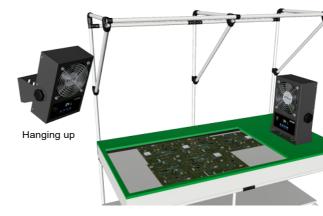

IR remote control

More convenient to operate

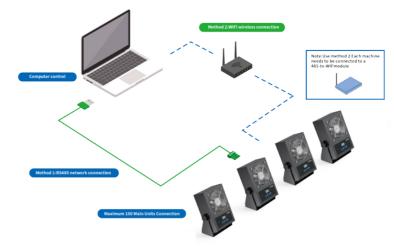

* $\boldsymbol{<}$ $\mathbf{<}$

Ó

Intelligent Management Platform

IoT function via wired (RS485) or WIFI Remotely control and manage multiple devicesv

Quickly neutralizes static electricity

Ionize a large amount of positive and negative ions to neutralize the static electricity on products and equipment surface.

Elimination time: 1.2 seconds (When eliminating static electricity from 1000V to 100V at a distance of 300 mm from the workplace)

Automatic cleaning device,

reducing manual maintenance

```
www.atten.com
```

lon balance warning function

When the ion balance exceeds the pre-set warning value, the ion deviation indicator light will be red, and the buzzer will beep at the same time.

RS485 communication indicator

Dual purpose bracket

It can be placed flat on the workbench or hung for use, suitable for a variety of places.

Packing list

Static Eliminator DC Ion Fan x1

Certificate x1

Remote control x1

User manual x²

Power cord x1

Ground wire x1
