

BC22R HIGH-PERFORMANCE ROAD BICYCLE LIGHT

| | |
|--|---------------------------|
| | 1400 LUMENS MAX OUTPUT |
| | 41 HOURS MAX RUNTIME |

WARNING

- Do NOT shine this light in the reach of children!
 - Do NOT shine the light directly into the eyes of anyone!
 - Do NOT point light head near flammable objects, high temperatures can cause objects to overheat and become flammable/grillable.
 - Do NOT point the light at your face or body, such as pointing the unit in your mouth, doing so could cause serious personal injury or death if the light or internal battery fails!
 - The light will accumulate a significant amount of heat while operating, resulting in a high temperature of the light shell. Pay close attention to avoid burns.
 - Turn off the light to prevent accidental activation during storage or transportation.
 - The LED of this light is not replaceable; so the light will need to be replaced when the LED reaches the end of its lifespan.
- (ENGLISH) FENIX BC22R BICYCLE LIGHT
- 1400 lumens maximum output, 156 meters maximum beam distance.
 - Utilizes one Luminus SST40 LED with a lifespan of 50,000 hours.
 - Included is a replaceable Fenix ARB-L18-3400 battery.
 - USB-C port.
 - Marine grade design, integrated with aerodynamics, is utilized to reduce wind resistance while riding.
 - Supports normal and emergency installations.
 - Handlebar mount, Adapter mount, and Switch.
 - Battery level indication and low-voltage warning.
 - Anti-glare lens facula makes lighting in urban cycling safer.
 - High-open lens design allows the light to illuminate from both sides, making it easier to see the road ahead, left, right and rear.
 - Size: 4.53" x 1.34" x 1.15" (11.5 x 34 x 29 mm).
 - Weight: 5.54 oz (157g) (including battery).

OPERATING INSTRUCTIONS

- On/off: Press and hold the switch for 0.5 seconds to turn off the light.
 - Output Selection: When the light is switched on, single click the switch to cycle through Low → Med → High → Turbo.
 - Flash Mode: With the light switched on, press and hold the switch for 1.2 seconds to enter the Flash mode and return to the previously used output.
- Intelligent Memory Circuit
- The light remembers the last selected output excluding Flash. When turned on again, the previously used output will be recalled.
