

XP 100

POWER STEERING FLUID BOOSTER, ESTER BASED

DESCRIPTION

XP 100 is a synthetic power steering fluid booster. The synergy between unique synthetic ester complex fluid and high-tech performance additives, improve performance as well as thermal and oxidative stability of the hydraulic fluid.

BASIC BENEFITS

- Improves vehicle steering.
- Reduces vibration and noise.
- Synthetic technology.
- Anti Oil leak.

PROPERTIES

- Smoothens vehicle steering operation.
- Significantly reduces friction and wear on all internal components.
- Protects under all conditions and extends the life of the power steering unit.
- Prevent leaks by maintaining optimum seal condition.
- Protects the oil from oxidation and maintains the power steering internally clean.
- Maintains hydrodynamic efficiency over a wide temperature range.
- Avoids overheating.

APPLICATION

Compatible with all OEM recommended power steering fluids.
Suitable for cars, vans, trucks, that uses a hydraulic power steering system.

Recommendation:

For maximum effect and advisability first remove (before applying) the old power steering oil from the system and refill it with new power steering oil plus the XP 100 additive.

DIRECTIONS FOR USE

Add 1 tube (100 ml) to the power steering fluid. Dosage is sufficient for up to 3 liters of oil.
Start the engine; turn steering wheel lock to lock several times. Check the power steering oil level.

TYPICALS

Form:	Liquid	PACKAGING
Colour:	Brown	100 ml tube (20 x 100 ml carton)
Boiling point/Boiling range:	Undetermined.	
Pour point:	-48 °C	
Flash point:	206 °C	
Flammability (solid, gaseous):	Not applicable.	
Self-igniting:	Product is not selfigniting.	
Danger of explosion:	Product does not present an explosion hazard.	
Density:	Not determined.	
Solubility in / Miscibility with water:	Not miscible or difficult to mix.	
Partition coefficient (n-octanol/water):	Not determined.	
Viscosity 40 °C:	67 mm ² /s
